NOTICE
APPLICATION FOR LEAD SAMPLING
RELIEF

Please be advised that the Municipality of Brighton has filed a Request for Regulatory Relief from Lead Sampling Requirements in Schedule 15.1 of Regulation 170/03, *Safe Drinking Water Act*.

Following Ministry of the Environment guidelines, the Municipality is eligible for relief from both Residential and Non-Residential lead sampling, and has applied for five (5) years of regulatory relief. If this application is granted, Residential and Non-Residential sampling would resume in 2015. However, this does not impact lead sampling requirements within the Distribution System, and such sampling will continue as normal.

If you require further information, please contact the Public Works & Environmental Services Department at 613-475-1162.
