

ADDENDUM #1

Tuesday, April 23rd, 2019

**Re: RFP # REC 2019-05 SPRINKLER SYSTEM DESIGN AND INSTALLATION
FOR MEMORIAL PARK, BRIGHTON, ONTARIO.**

From: Jim Millar, Director of Parks and Recreation

Upon receiving comments from a couple of interested Proponents, I have figured that it would be advantageous to clarify a couple of items to go along with what is being asked for in this Request For Proposals.

1. Correction of last date for questions.

Page 9 Information and Instructions under Questions/Clarification Request,

The last date for questions on this RFP is Thursday, May 2nd, 2019. Disregard the date on the RFP.

2. Q. Do I require Shop Drawings?

- A. Each submitted Proposal must contain a Shop Drawing of the project complete with a backflow preventer.

3. Q. Can I Make Use of the Existing Sprinkler System's In-Ground Control Boxes?

- A. As there is a Municipal water line existing at that point from the main it would be the best way to tackle this proposal. All controls are to be located in the facility storage room where access to Wi-Fi is available.

DO NOT FORGET TO BID REGISTER WITH LISA. lisa@brighton.ca
